PROFILE

I am a Software Engineer who builds web applications. With a solid foundation in HTML, CSS, Javascript, I specialize in modern technologies like NextJs, ReactJs, Typescript. I am always open to learning other technologies to deliver the best results.

WORK HISTORY

Frontend Quiz – [view the project](#)

Tech Stack: ReactJs, TailwindCSS, ContextAPI

- Built a web application to test users' knowledge of HTML, CSS, JavaScript, and Accessibility.
- Users can select a subject, answer multiple choice questions with instant feedback, view their final score, and toggle between light and dark mode for better user experience.
- Used ContextAPI for state management and styled it using TailwindCSS.

Ecommerce Website – [view the project](#)

Tech Stack: React, React-Bootstrap, Sass, ContextAPI

- Built an ecommerce website showcasing a curated selection of clothes and footwears through an interactive lightbox gallery and thumbnail navigation. Users can add or remove items from their cart, view their cart items, and receive instant toast notifications.
- Used ContextAPI for state management and styled it using React-Bootstrap, Sass.

Terapacks, Lokoja, Kogi State

Sept. 2022 – Oct. 2024

Position: Web Instructor (Frontend Development)

- Taught HTML, CSS, and JavaScript to students using

interactive learning methods.

- Guided students to build projects and improve problem solving skills.
- Implemented innovative teaching methods, such as interactive exercises, resulting in increased engagement and knowledge retention.

Sushi Food - [view the project](#)

Tech Stack: HTML, Bootstrap, Sass, Javascript

- Sushi Food is a web application where users can explore a variety of sushi dishes, add them to their cart, and easily find their favorites using the search feature.
- Implemented cart functionality, and live search using vanilla JavaScript.
- Used Bootstrap and Sass to style the application.
